

BUILDING LOW CARBON PROVINCES AND CITIES:

Practical Tools to Support Local Target Planning

Fong Wee Kean

Associate

GHG Protocol China

World Resources Institute

Wang Ke

Executive Director

Program of Energy and Climate Economics

Renmin University of China

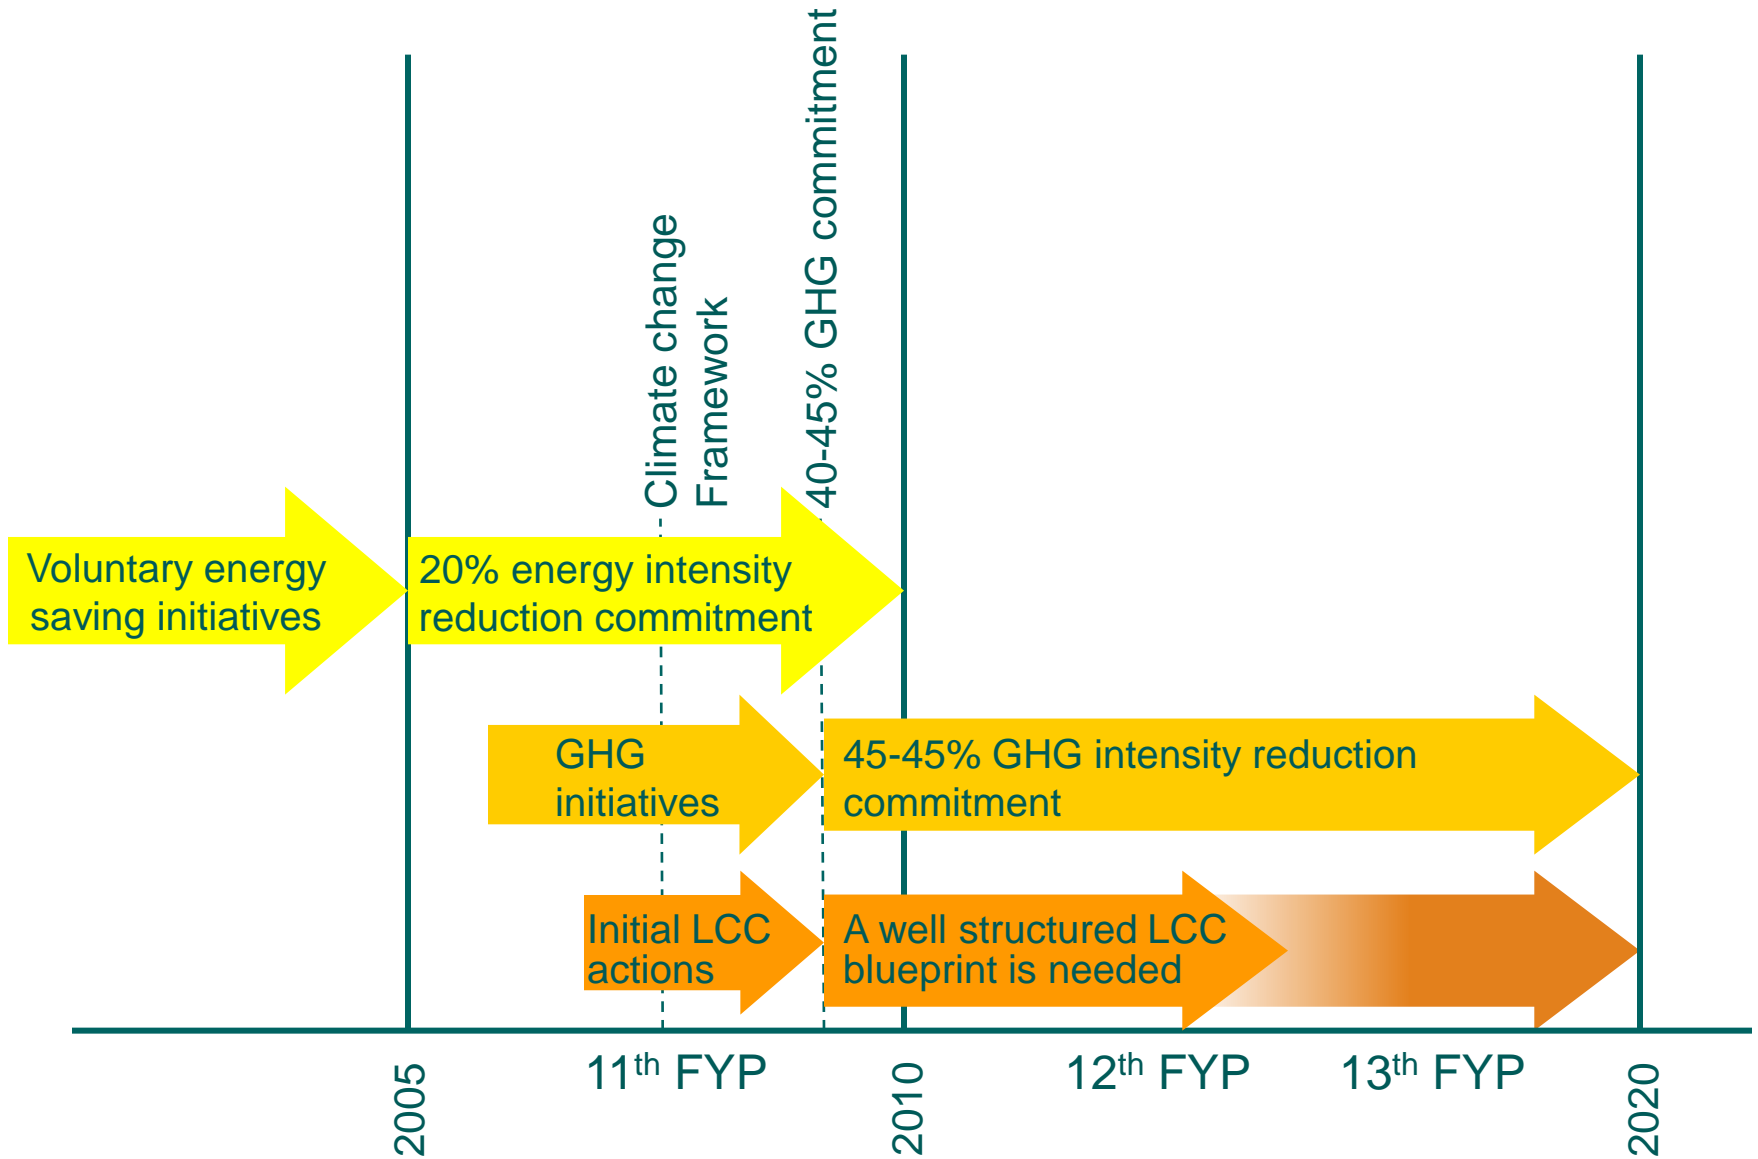

WHY FOCUS AT CITY LEVEL?

- Population concentration
- High energy intensity
- City governments have direct control on many emission sources in cities

PRESENT SCENARIO AND NEEDS

EXISTING TOOLS & PROTOCOLS

**Draft Int'l Standard for Determining
GHG Emissions for Cities, UNEP *et al.***

2010

**Int'l Local Gov't GHG Emissions
Analysis Protocol, ICLEI**

Project 2 Degrees - C40

The CO2 Calculator - Denmark

2005

Bilan Carbone - France

ECO2Region - Switzerland, Germany, Italy

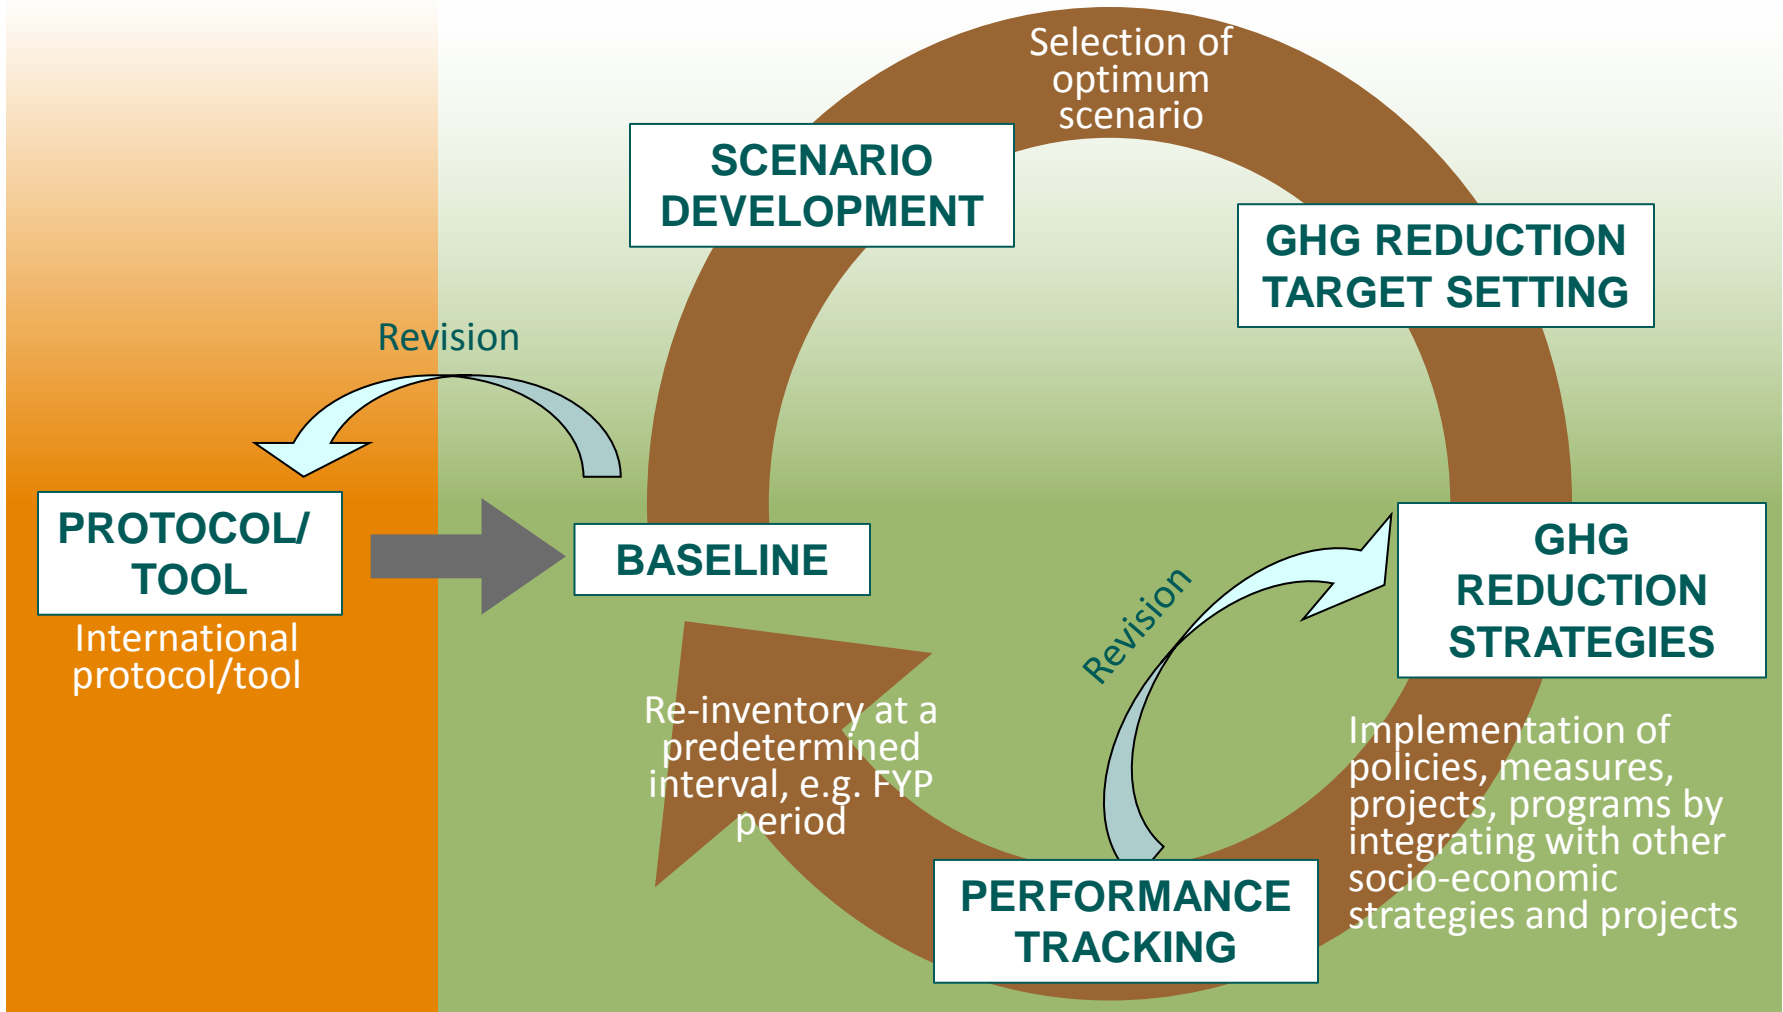

CO2 Grobbilanz & EMSIG - Austria

2000

GRIP - UK

LOW CARBON CITY PLANNING TOOLKIT
